## DETAILED ACTION

### *Drawings*

1. The drawings were received on 9/20/2003. These drawings are not approved.
2. Applicant proposed to amend the specification to clarify that newly submitted FIG 5 depicts a bottom-gate TFT embodiment. Newly presented FIG 5 sets forth new matter because the specification as originally filed did not disclose for a bottom-gate TFT:

- a. Source/drain regions being laterally spaced from the first metal extending region (or restated, providing the semiconductor region with a pair of regions having second portions that are not overlapped by the first conductive layer); or
- b. the semiconductor region being formed over the gate and interposed insulating layer so as to be planar.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified

Art Unit: 2815

and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. The claims are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

a. Regarding claims 1 and 44-48 (and those claims depending therefrom), the specification as originally filed did not disclose for a bottom-gate type TFT that extending portions of the first conductive layer overlap the first portions of said pair of regions while the second portions are not overlapped by said first conductive layer.

b. Regarding claims 45-48 (and those claims depending therefrom), the specification as originally filed did not disclose for a bottom-gate type TFT that a distance between the first portion and the source or drain region is either larger than, equal to or less than a thickness of the second conductive layer.

Art Unit: 2815

- c. Regarding claims 67-72, the specification as originally filed did not disclose an SiO<sub>x</sub> insulating layer interposed between the upper gate metal and the bottom of the semiconductor region in a bottom-gate type TFT.

### ***Response to Arguments***

5. Applicant's arguments filed 9/20/04 have been fully considered but they are not persuasive.

- a. Applicant has referenced the features of other drawings setting forth top-gate embodiments, but has not pointed to any portion of the specification that supports the depiction or claiming of the noted features in bottom-gate embodiment.

- b. Further regarding the drawings, applicant first asserts that FIG 5 is intended to be schematic, but then conversely asserts, "it is apparent from FIG. 5 and from Applicant's specification that the overlying thin film may be planar." Restated, applicant asserts that proposed FIG 5 is, in fact, intend to teach a semiconductor film/region that is planar.

Also, please note that any potential showing that a feature is obviousness does not overcome new-matter objections/rejections.

### ***Conclusion***

6. This is a RCE of applicant's earlier Application No. 09/389,393. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in

Art Unit: 2815

this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
